Subject: RE: April 15 FS Technical Meeting; Status of PTM and Oregon Hot Spot information

Jim – HQ has raised some issues with our PTW memo that we are working through, so you won't be getting it until Friday, April 11. We will try to get it out to you as soon as possible on Friday.

We will have to table the discussion on Oregon Hot Spots. We have no ETA for completion. Once DEQ has a final evaluation that they can share with EPA, we will let you know and can then schedule this topic for discussion. You may want to have Anchor put a TBD in for the date on this.

Subject: April 15 FS Technical Meeting; Status of PTM and Oregon Hot Spot information

Kristine,

This is a reminder that according to the latest version of the FS Revision Process Matrix the EPA indicated it would aim to provide the maps and rationale for potential principal threat areas (Issue 3.5) by yesterday. Based on our discussion yesterday it is our understanding that EPA is aiming to provide that information by close of business Thursday, April 10.

Additionally, DEQ was to identify potential Oregon Hot Spot areas and aim to supply maps and rationale to EPA and LWG by April 8 (Issue 3.6). This information is necessary for the LWG to prepare for the FS technical meeting scheduled for next Wednesday, April 15. You indicated yesterday that EPA had not yet received information from DEQ about Oregon Hot Spots, and that EPA will need time to review it before providing to the LWG. Without the specific information from DEQ we will be limited to only having a general discussion of Oregon Hot Spots on April 15. Once we receive DEQ's Hot Spot information the LWG will need time to evaluate it, and then we can schedule a follow-up technical meeting to discuss the Issue 3.6 in depth. Please let us now when you received an update from DEQ regarding the status of their Oregon Hot Spot information.

Thanks,

Jim McKenna
